

Mark the odd one out from the given options.

- ☐ Cow
- ☐ Whale
- ☐ Hen
- ☐ Pig

Consider the following statements and determine which of the given conclusions follow.

Statement:

A. All good jumpers win.

B. All good jumpers eat well.

Conclusions:

I. All those who eat well are good jumpers.

II. All those who win eat well.

☐ Only II follows

☒ Only I follows

☐ Either I or II follows

☐ None follow

Consider the following statements and determine which of the given conclusions follow.

Statements:

A. No pencil is an eraser.

B. Pen is a pencil.

Conclusions:

I. Pen is not an eraser.

II. All pencils are not pens.

- ☐ Only conclusion I follow
- ☐ Neither conclusions I or II follow
- ☐ Either conclusion I or II follows
- ☐ Only conclusion II follows

Read the following passage and answer the given question.

Paris was the undisputed capital of women's fashion from the 17th century until well into the 20th. Among 18th-century dress styles, the most typically French was the sack dress, also known as the robe à la française, which usually took the form of an open robe, with a joined bodice and skirt that opened in front to reveal an underskirt or petticoat. Fashion in the 18th century was highly decorative and luxurious for both men and women. Fashionable Display was controversial, however, and moralists were scandalized by Bernard Mandeville's *Fable of the Bees* (1724), which argued that private vices might be public virtues. Taking an economic approach, Mandeville pointed out that lavish spending on dress "trickled down" to employ numerous skilled artisans, such as tailors and embroiderers.

Why did Mandeville say 'private vices might be public virtues'?

- ☐ To apologize for his bad habits
- ☐ To shame people into giving up their vices
- ☐ To encourage people to donate money to the poor
- ☐ To justify the lavish spending on dresses

Five friends A, B, C, D and E, with different occupational backgrounds (Teacher, Doctor, Accountant, Businessman, Engineer) went for a conference. The doctor sat next to B. The engineer sat in between B and C. Neither A nor the accountant sat at any of the extreme ends. If D does not sit next to B, then which of the following is definitely sitting at one of the extreme ends?

☐ A

☐ D

☐ B

☐ C

Taxi drivers need to remember a complex web of tens of thousands of streets whereas, bus drivers, who follow a constrained set of routes, need only a limited knowledge of the city's layout. It has been found that a part of the brain - the hippocampus - is much larger in the taxi drivers than that in the bus drivers with similar age and professional driving experience. The size of the hippocampus increases with years of professional driving experience only in the taxi drivers, and it shrinks back to the normal size when the taxi drivers retire. If the facts stated in the passage above are true, which of the following cannot be concluded about the human brain?

- ☐ The size of the hippocampus region is a function of the demands placed on spatial memory by navigating in a complex, large space.
- ☐ The size of the hippocampus region of the brain decreases with advancing age.
- ☐ Brain changes acquired through learning and practice might be reversed when the call on stored knowledge lessens.
- ☐ At least some specific structural changes in an adult human brain can be induced by relevant environmental stimulation

It is the developed world that has the capability to combat climate change. It is these developed countries that have the research capabilities to come up with the necessary technology to make the economy greener, to produce renewable energy, to mitigate against the disasters. Moreover, these are the countries that have the finances available to fund these activities; not only funding the research looking for the solutions but also the financial resources to put them into action all around the world.

Which of the following conclusions can most properly be drawn from the information given above?

- ☐ Only developed countries have the expertise to put new inventions and projects into practice to mitigate climate change.
- ☐ Developed nations must be the forerunners of initiatives to combat change.
- ☒ Developing countries turn to powerful financial centers in developed countries to finance large projects to mitigate climate change.
- ☐ Developed nations, with their resources, have an increased responsibility to mitigate climate change.

Read the following passage and answer the given question.

Paris was the undisputed capital of women's fashion from the 17th century until well into the 20th. Among 18th-century dress styles, the most typically French was the sack dress, also known as the robe à la française, which usually took the form of an open robe, with a joined bodice and skirt that opened in front to reveal an underskirt or petticoat. Fashion in the 18th century was highly decorative and luxurious for both men and women. Fashionable Display was controversial, however, and moralists were scandalized by Bernard Mandeville's *Fable of the Bees* (1724), which argued that private vices might be public virtues. Taking an economic approach, Mandeville pointed out that lavish spending on dress "trickled down" to employ numerous skilled artisans, such as tailors and embroiderers.

Which of the following is an assumption made by Mandeville in the last sentence of the passage?

- ☐ Elaborate spending on dresses is justified as it helps the skilled artisans and tailors.
- ☐ The employment of tailors and skilled artisans is not dependent on lavish spending on dresses.
- ☐ It made economic sense to spend lavishly as it helped the skilled artisans
- ☐ Skilled artisans belong to the low income groups

Directions: The problem below consists of a problem followed by two statements.

Decide whether the data in the statements is sufficient to answer the question. Select your answer depending upon whether the data provided in:

- (A) statement 1 alone is sufficient, but statement 2 alone is not sufficient to answer the question
- (B) statement 2 alone is sufficient, but statement 1 alone is not sufficient to answer the question
- (C) both statements taken together are sufficient to answer the question, but neither statement alone is sufficient to answer the question
- (D) each statement alone is sufficient to answer the question
- (E) statements 1 and 2 together are not sufficient, and additional data is needed to answer the question

Problem: Does the integer y have at least two different prime factors?

Statement 1: $y/10$ is an integer.

Statement 2: $y/6$ is an integer.

☐ D

☐ B

☐ C

☐ A

Ranbir, Ranveer, Randheer, Ranjeet and Rajbeer maintain ranking for batting and bowling. The ranking was in descending order. Rajbeer, who was ranked first in batting, was last in bowling. Randheer had the same ranking in both and was just above Rajbeer in bowling. In batting, Ranbir was just above Ranjeet but in bowling, he was in the middle and he bowled after Ranveer. Who was ranked first as a bowler?

- ☐ Ranveer
- ☐ None of these
- ☐ Randheer
- ☐ Rajbeer

In a row of friends, Tia occupies fifteenth place from the right end and Tina occupies twelfth place from the left end, respectively. Tristen is ninth on the left of Tia. If Tristen and Tia interchange their places, then Tristen occupies twentieth place from the left end. How many friends were there between Tristen and Tina originally?

- ☐ 0
- ☐ 15
- ☐ 3
- ☐ 12

Read the following passage and answer the given question.

Paris was the undisputed capital of women's fashion from the 17th century until well into the 20th. Among 18th-century dress styles, the most typically French was the sack dress, also known as the robe à la française, which usually took the form of an open robe, with a joined bodice and skirt that opened in front to reveal an underskirt or petticoat. Fashionable Display was controversial, however, and moralists were scandalized by Bernard Mandeville's Fable of the Bees(1724), which argued that private vices might be public virtues. Taking an economic approach, Mandeville pointed out that lavish spending on dress "trickled down" to employ numerous skilled artisans, such as tailors and embroiderers.

Fill in the blanks with the most suitable option.

If she _____ about the accident, she _____ visited you immediately.

- ☐ known, would
- ☐ had known, would have
- ☐ knew, will have
- ☐ knows, will

Read the following passage and answer the given question.

Paris was the undisputed capital of women's fashion from the 17th century until well into the 20th. Among 18th-century dress styles, the most typically French was the sack dress, also known as the robe à la française, which usually took the form of an open robe, with a joined bodice and skirt that opened in front to reveal an underskirt or petticoat. Fashion in the 18th century was highly decorative and luxurious for both men and women. Fashionable Display was controversial, however, and moralists were scandalized by Bernard Mandeville's *Fable of the Bees* (1724), which argued that private vices might be public virtues. Taking an economic approach, Mandeville pointed out that lavish spending on dress "trickled down" to employ numerous skilled artisans, such as tailors and embroiderers.

One of the claims made by Mandeville was that - ?

- ☐ Women's fashion was more luxurious than men's fashion
- ☐ The sack dress was the most popular dress in France in the 18th century
- ☐ Paris was the world's fashion capital from 17th to 18th century
- ☐ Lavish spending on dress ultimately benefited many skilled artisans

In a certain coding system 'BAT' is coded as 283 and 'CAT' is coded as 383; ARE is coded as 801. How will you code 'BETTER'?

☐ 123301

☐ 12334

☐ 213310

☐ 213301

In a row of 50 girls, Amy was made to sit 20 places to the right of Rose and Peter sat 20 places to the left of Emma. If Emma was thirty sixth from the left and there were four people between Peter and Amy. What was the position of Rose in the row?

- ☐ 1st from the left end
- ☐ 49th from the right end
- ☐ 25th from the left end
- ☐ 20th from the right end

A food delivery company gained greater profits when it provided food delivery service in a city by following no-minimum order facility and by maintaining its own fleet of employees. Besides the commission it gets from restaurants, it charges no delivery charges for orders which are higher than a certain amount. Hoping to continue these financial trends, the company plans to start its operations in two new cities.

The plan of the food delivery company as described above directly assumes all of the following EXCEPT:

- ☐ The demand for food delivery service in the new cities will increase in future.
- ☒ In the new cities, the company will be able to deliver food faster than the food delivery companies existing in those cities.
- ☐ Expanding into markets will compensate for any new expenses the company incurs.
- ☐ The company can find enough number of partner-restaurants in the new cities to earn more than what is needed to meet the fixed expenses it has to earn.

If $\text{COOKER} = +//2*5$, $\text{ROOSTER} = 5//\$ \% *5$, then what would be the equivalent of MOOSE most appropriately among the following?

☐ $0//\*

☐ $5//\*

☐ $0//\% ^*$

☐ $0++\*

Editor: I have received over five thousand letters and emails on the article that I wrote last week. Majority of those letters and emails support my viewpoint on the issue. These letters are, therefore, the testimonials that most of our readers have the same opinion on the issue as I do. Which of the following, if true, would weaken the editor's conclusion above?

- ☐ Readers who agree with the editor are more likely to write to him than those who disagree with him.
- ☐ Those were other articles by the same editor which invited a lot of opinion of readers
- ☐ The issue was very important for the readers have a very objective opinion about the issue
- ☐ Readers who agree with the editor's view feel more strongly about the issue than those who disagree with him.

Five friends, Jay, Raj, Shivansh, Monu and Mehul have different professions-Teacher, Singer, Police, Bank Manager and Actor. Each one wears different colors of ties-Yellow, Black, Grey, Green and orange though not respectively in the same order. Shivansh is an Actor but doesn't wear a Black or Orange colored tie. The person who is wearing Green colored tie is neither teacher nor police. Jay and Mehul are not Bank manager and they do not wear Yellow-colored tie. Grey colored tie is worn by Monu, who is neither a Singer nor a Bank Manager. Bank Manager wears a Green colored tie. Who is Bank Manager?

- ☐ Raj
- ☐ Jay
- ☐ None of these
- ☐ Monu

Pradhan, Qureshi, rastogi, sharma and talreja are students coming from gwalior, Bhopal, indore, Ujjain and guna not necessarily in that order. They have topped in different subjects among math, English, hindi, science and geography. The student from guna has topped in math, Qureshi comes from Ujjain and sharma from gwalior. The student from indore has not topped in science. Pardhan topped in science and Talreja in geography. From which city does the topper in English come from?

- ☐ Gwalior
- ☐ Guna
- ☐ Ujjain
- ☐ Indore

Find the odd word among the given options.

- ☐ Vehement
- ☐ Emphatic
- ☐ Apathetic
- ☐ Impassioned

There are six houses in a colony, such that 3 houses are in one row and the other 3 houses are in the opposite row. The three houses in a row are equidistant from each other. Each house is exactly opposite the house in the other row. Each house is painted with a different color from red, blue, green, yellow, pink and orange.

1. Houses at the corner are not painted with blue and red color
2. House painted with orange color is not opposite the house painted with green color
3. Yellow and pink colored houses are not in the same row

Which house is diagonally opposite the orange colored house?

- ☐ Pink
- ☐ Green
- ☐ Blue
- ☐ Yellow

On a racing track, six players, U,V,W,X,Y and Z were positioned in such a way that U was to the left of Y and fourth to the left of X. W was in between and equidistant from Y and Z but Y is not adjacent to X. The winner was at the fourth section of the track from the left. Who was he?

☐ Z

☐ Z or W

☐ U

☐ W

Find the odd word among the given options.

- ☐ Calculated
- ☐ Spontaneous
- ☐ Rehearsed
- ☐ Premeditated

Practice Set - 2

1) Ans: - d) None follows (winner → good)

2) Ans: - a) Only conclusion 1 follows (Pencil)

3) Ans: - d) To justify the lavish spending on art

4) Ans: - b) D

5) Ans: - b) The size of the hippocampal region of brain decreases with advancing age

6) Ans: - d) Developed nations, with their resources have an increased responsibility to mitigate climate change.

7) Ans: - c) It made economic sense to spend lavishly as it helped the skilled artisans

2Ans: a) D

3Ans: b) None of these

10Ans: a) 0

11Ans: a) NNPM

12Ans: b) had known, would have

13Ans: d) Lavish spending on dress & ultimately benefited many skilled artisans

14Ans: c) 213310

15Ans: b) 49th from right end

16Ans: b) In the new cities the company will be able to deliver food faster than the food delivery company existing in those cities.

17Ans: a) 0/15*

18Ans: a) Readers who agree with the editor are most likely to write to him than those who disagree with him.

19Ans: a) Raj

20Ans: a) Gwalior

21 Ans - C) Apathetic ^{2:0}

22 Ans - b) Green

23 Ans - b) 2 or 3

24 Ans - b) Spontaneous
